STUDENT PROGRESS WORKSHEET

Check When Completed

1. Choose a topic that you are interested in doing (one that is not too hard nor too easy).
 - A. Organize everything you plan to do. (fill out Planning Worksheet).
 - B. Write out your procedure.
 - C. If you are doing an experiment, make a guess (hypothesis) about what you think will happen.

Gather your materials.

Perform your experiment.

Record your observation.

What did you learn or find out by doing this experiment?

See if your original guess was correct.
 - D. Complete Student Record Sheet "The Scientific Method".
 - E. Collections, models and demonstrations should be made, labeled, etc.
2. Begin work on your display. Present the information you collected in easy-to-read graphs or tables.
3. Prepare a 1-2 minute oral report or explanation of your project for the judges.

4. Bring your project to school to set up.
